

# WasteMate

“If you can measure it,  
you can manage it.”

“The WCTS (by ManageMate) provides us with information on total bin lifts and amounts of waste collected and recycled which is vital for reporting and evaluating the performance of individual programs, waste streams and contamination as well as the goals and targets in Waste Strategy 2006.” City of Ryde Council

## > WASTEMATE - WCTS

Designed specifically for the waste management sector, WasteMate incorporates the functionality of the ‘case study’ shown elsewhere as the WCTS (Waste Collection & Tracking System) implemented firstly with Ryde City Council and coupled to the latest versions of our other ‘MATES’.

WasteMate is the most comprehensive, reliable and flexible system in the Australian market place and has proven to be a pivotal tool for Councils to reduce the long-term cost of the waste collection process, while at the same time meeting the environmental standards set by government (particularly waste to landfill & recycling) while also satisfying constituents’ needs both present and future.

## > SYSTEM FEATURES

- **WEBMATE** – See Below
- **WEIGHMATE** – See Brochure
- **MAPMATE** – See Brochure
- **VIDEOMATE** – See Brochure
- **REPORTMATE** – See Brochure

### WEBMATE

Is the access point and communication hub of the WCTS/ WasteMate. All the information is stored in a database that is then accessible by you through the web to enable the remote management and the administration of the system.

- **Call-Centre** – rate payers disputes / enquiries and/or for job allocation with the waste collection company
- **Accounts** – create, amend and/or retire accounts
- **Bins** – create, amend and/or retire bins to particular accounts
- **Bins to be Delivered** – the tracking and management of Bin delivery
- **Bins to be Removed** – the tracking and management of Bin removal
- **Bin Types** – allocation and management of Bin types
- **Trucks** – create, amend and/or retire Trucks
- **Truck Events** – monitor WCTS operations at more detailed level
- **Users** – create, amend, and/or retire Users
- **Options** – determine and manage basic WCTS parameters
- **Audit** – audit User activity throughout the WCTS

## > SYSTEM BENEFITS

- Breaking through the recycling rate ‘ceiling’ in your Council
- Know the true cost of waste management
- Reducing the cost to manage the waste collection process
- Introduction of an equitable fee or fine system to the waste producers
- Directing targeted educational campaigns
