

DataMate

“If you can measure it, you can manage it.”

“The advantages include; the ability to track the total number of collections, information transfer to base via an ‘iburst’ wireless link, flexible service options, generation of reports using specific non-standard service triggers and the use of data obtained improved management effectiveness.”

> DATAMATE

DataMate is the label given to our integrated Data Collection Systems which allow us to develop and deliver ‘customised’ data systems based on the client’s specific data requirements utilising any number and/or combination of our suite of Mates.

A Case Study example of a recent DataMate has been developed is the Waste Collection & Tracking System (the WCTS) known as WasteMate.

- **Call-Centre** - client enquiries
- **Accounts** – create, amend and/or retire accounts
